

Pearson Vue is trying to identify individuals with extensive experience in the insurance industry who can participate in our 2009 Job Analysis as Subject Matter Experts. The meetings will be held in Chicago in April and October. Our goal is to have representation from all 51 U.S. jurisdictions in order to develop a national examination. They want to make sure every state is represented fairly in the process, so they still need potential subject matter experts in many states, including: AL, AZ, IN, KY, LA, MA, MS, NE, NH, NY, PA, SC, SD, UT, VT.

Please contact insurancejobanalysis@pearson.com if you or someone you know is an insurance professional who meets most of the following:

- ◆ Are licensed as a Life, Accident & Health or Property & Casualty Producer
- ◆ Have at least 10 years experience as an insurance agent/producer
- ◆ Are NOT pre-licensing educators (due to conflict of interest)
- ◆ Are members of insurance associations or other professional groups (i.e. SILA)
- ◆ Hold advanced insurance certificates or education (i.e. CPCU, CLU, etc.)

Thank you.
